

Press Release

ChromaCon enters into an agreement with YMC India to represent the Contichrom systems in India.

Zurich, Switzerland and New Delhi, India, March 27, 2018.

ChromaCon and YMC India announced today that they have entered into a Distribution Agreement. Under this agreement, YMC India will act as distributor and provide after-sales service and application support for Contichrom systems in India.

The Contichrom line of products consists of FPLC and HPLC systems with advanced process technology. The Contichrom CUBE and CUBE Combined are FPLC systems for the purification of biopharmaceuticals, giving access to superior continuous chromatography processes. The Contichrom HPLC provides the same benefits for peptide and small molecule applications. The recently launched Contichrom Discovery automates and simplifies multi-step purifications of protein and antibodies at R&D scale.

Michael Bavand, CEO of ChromaCon commented: “The Indian biotech industry is very strong, especially in bioprocessing of antibodies and production of peptides. With YMC India we now have a valuable partner, who can address the needs of these customers for local representation of our Contichrom systems. We look forward to leveraging both of our companies’ expertise to benefit pharma and biotech customers in India.”

About ChromaCon AG

ChromaCon AG is a private Life Science Tool company located in Zürich, Switzerland, providing best-in-class process solutions to the biopharmaceutical industry. ChromaCon has developed and patented novel process principles, process control and simulation software, equipment designs and operating software for batch, cyclic and continuous chromatography. These process solutions result in significant CAPEX and OPEX cost savings and enabling scalable chromatographic solutions for large scale purification applications. The Contichrom® laboratory-scale equipment is co-marketed worldwide by ChromaCon and its partners. ChromaCon has provided global licenses for its process technologies to LEWA for implementation into scale-up systems. ChromaCon also develops and markets affinity purification solutions for column and membrane chromatography applications and tools for site-specific protein conjugation.
